Philosophy, Goals, Objectives and Comprehensive Plans

TECHNOLOGY PLAN

The County Superintendent and the County Board recognize that technological resources can enhance student achievement by increasing student access to information, developing their technological literacy skills, and providing instruction tailored to student needs. Effective use of technology can also increase the efficiency of the non-instructional operations and governance. The County Superintendent and County Board are committed to the development and maintenance of an infrastructure that serves all County Superintendent and County Board sites and programs, and to providing staff professional development that will allow the implementation of existing and new technologies.

The County Superintendent or designee shall develop a three- to five-year technology plan which:

1. Focuses on the use of technology to improve student achievement and is aligned with adopted vision and goals for student learning.

2. Contains clear goals for the use of technology based on an assessment of County Superintendent needs.

3. When required, addresses all components required for state or federal technology grant programs administered by the California Department of Education. (Education Code 51871.5, 52295.35; 5 CCR 11974; 20 USC 6764; 47 CFR 54.508.)

4. Addresses the use of technology to improve governance, school site administration, support services, and communications.

The County Superintendent or designee shall ensure that any use of technological resources protects the private and confidential information of students and employees in accordance with law.

Planning Team

The County Superintendent or designee shall appoint a planning team to assist with the development of the technology plan.
